Artistic Pools

Mark Peditto (President) and Mike Neri (VP), CO-Founders of Artistic Pools Corp have been a leading installer and Distributor of San Juan Pools Since 2003.

Our business model is like a well-oiled machine. In the early stages we doubled our business the first 3 years and now lead the nation in sales, Installing over 100 San Juan Fiberglass Pools a year! We pride ourselves on customer service and best installation practices.

Our 5 Star review ratings on multiple review platforms show the high value we place on customer satisfaction. Artistic Pools now has over 1500 San Juan Fiberglass Pools installed throughout NJ, PA and DE. We have been the Northeast Distribution hub for San Juan Pools since joining forces in 2003. Since then Artistic Pools has distributed more than 2,500 San Juan pools in the Northeast.

You see when you choose Artistic Pools...you choose a family that's dedicated to making sure your project goes just as planned. We all share the same goals and aspirations and that's giving you the absolute best Fiberglass Pool the industry has to offer along with the best staff and craftsman to build your DREAM POOL. From the initial meeting with Craig Schaal our VP of Sales to the final walk through you will feel confident "you've made the right choice".

Artistic Pools

Artistic Pools invests heavily into placing early buys with our Suppliers to avoid any potential delays in gathering the necessary equipment to complete your new San Juan Pool project. Our climate controlled equipment warehouse guarantees your pool equipment shows up in Pristine condition. We welcome you the opportunity to walk our Fiberglass Pool Supercenter...visit our indoor Pool showroom and gather the necessary info from our Sales staff to help you get one step closer to owning your new San Juan Fiberglass Pool.

Artistic Pools Super Center

Welcome to the Northeast's largest Fiberglass Pool Supercenter located in Cinnaminson NJ. Artistic Pools began its journey into Fiberglass Pool distribution back in April 2003. Since that time we have grown from a small pool depot into a massive Supercenter. This post will take you back in time and show exactly how Artistic Pools transformed an ordinary grass lot into the country's finest Fiberglass Pool distribution center. We will also highlight how this business model catapulted Artistic Pools into becoming San Juan Pools single largest Fiberglass Pool builder in the country now selling and installing 100 plus San Juan Pools each and every year.

Our Craftsman outfit every San Juan Fiberglass Pool many days before installation date ensuring that all fittings are properly secure and ready for water. With over 1,500 San Juan Pools installed since 2003 Just know you've made the right choice!

We have the very first Grass, mud and Dirt free distribution center. Your Pool arrives as clean as it comes off the mold. We treat every pool as if it was our own! Best of the Best mentality here at Artistic Pools Corp!

Artistic Pools

Artistic Pools SuperCenter has been Distributing San Juan Pools now for over 20 Years and have more than 2,500 Fiberglass Pools moved up and down the East Coast. Just know we take great pride in the Handling and Loading of your new San Juan Pool.

Feeling the Squeeze: How Installers Are Fitting Fiberglass Pools Through Tighter Spaces

Feeling the Squeeze: How Installers are fitting Fiberglass Pools through tighter spaces with bigger homes on smaller lots, dealers must get creative and that's exactly what Artistic Pools did here.

By: Nate Taylor

You're not imagining things: The Great American Backyard is shrinking.

In their zeal to maximize available land, developers are packing homes into parcels so tight that it's chocking out traditional access points for fiberglass pools, such as the side yard. And some homes are so tall and close to each other that crane operators are turning the jobs down.

This trend is causing real logistical problems for dealers. And yet homeowners are demanding fiberglass pools like never before.

What are installers to do?

Get creative.

The handoff by Artistic Pools Corp

Installers transfer the pool from one excavator to the other, affixing it onto the smaller machine.

Installers transfer the pool from one excavator to the other, affixing it onto the smaller machine. The neighbor called it impossible. Mark Peditto was happy to prove him wrong.

Peditto and Michael Neri, president and vice president, respectively, of Artistic Pools, orchestrated one of the trickiest installations of their career when they squeezed a 15-foot-wide, 34-foot-long pool through a space about as wide as the pool was deep.

Because the houses were too tall and the yard too far back, craning the pool over was out of the question. So the Cinnaminson, N.J. builder planned to use an excavator to carry the pool through the side yard. The problem? The chimney. The excavator couldn't fit between it and the house next door.

This would be a job for two excavators — one large and one small.

The large one, holding the pool on its side by a series of straps around the bucket, transported it to the midway point of the side yard, where it met its smaller counterpart, bucket to bucket. From there, the team rigged the dangling pool to the bucket of the small excavator in a midair exchange.

“We made sure that, before disengaging from the excavator, that it was securely in place on the lifting hook of the second one,” Peditto explains.

So the pool wouldn't swing pendulously between two \$800,000 homes, crew members dropped its back end onto a series of dollies. This allowed the smaller excavator to pull the pool straight on through to the other side, past the chimney.

“We've done pools in tight yards, but that was a pretty innovative way of getting it back there,” Peditto says.

And a funny thing about the neighbor who claimed it couldn't be done: He was a pool builder.

San Juan Pools makes the Strongest fiberglass pool in the World and Here's Why

San Juan Pools are known for their high-quality construction process, emphasizing durability and longevity. Here's a breakdown of how they're made:

Hand-Laid Fiberglass: This is a key differentiator for San Juan Pools. Instead of using the "chop gun" method (spraying chopped fiberglass onto a mold), they employ a meticulous hand-laying process. Skilled craftsmen meticulously layer sheets of fiberglass, woven roving, and vinyl ester resin by hand. This method ensures consistent thickness and strength throughout the pool shell.

Premium Materials: San Juan Pools utilize high-quality materials, including:

Vinyl Ester Resin: This resin is highly resistant to chemicals and provides exceptional strength and durability.

Woven Roving: This type of fiberglass reinforcement adds significant strength to the pool shell.

Multiple Layers: Each pool typically consists of multiple layers of fiberglass, providing exceptional structural integrity.

Experienced Craftsmanship: San Juan Pools employs experienced laminators who are skilled in the art of hand-laying fiberglass. This expertise ensures that each pool is constructed with precision and care.

San Juan Pools are known for their exceptional strength and durability, which is attributed to their unique manufacturing process:

* **Hand-Laid Fiberglass Construction:** Unlike some other fiberglass pools that use chopped fiberglass, San Juan Pools utilize a time-intensive process of hand-laying multiple layers of solid fiberglass sheets. This meticulous layering creates a more consistent and structurally sound shell with superior strength.

* **High-Quality Resins:** They employ premium-grade resins, including vinyl ester resin, which offers enhanced strength, chemical resistance, and resistance to osmosis (water intrusion).

* **Precise Molding:** The pools are meticulously molded in controlled factory environments, ensuring consistent thickness and minimizing the risk of imperfections.

* **Reinforced Construction:** Strategic placement of reinforcements within the pool shell further enhances its structural integrity. These factors combine to create a robust and long-lasting pool that can withstand the stresses of ground shifts, temperature fluctuations, and the effects of pool chemicals.

By utilizing these methods and materials, San Juan Pools aims to create fiberglass pools that are not only beautiful but also incredibly strong and durable, designed to last for generations.

ABOUT SAN JUAN POOLS

Since 1958, San Juan has grown from a small Washington based company to a well governed nationwide organization with numerous manufacturing plants throughout the United States. Along with each plant's network of locally owned independent authorized San Juan Dealers, they design and craft the most elegant fiberglass pools in America.

That first San Juan Fiberglass pool started a worldwide revolution in the manufacturing of fiberglass swimming pools and while many have tried to copy San Juan Fiberglass pools, none have succeeded. Now over 60 years later, quality San Juan Fiberglass pools are being installed in beautiful homes all over the world.

GLOBAL MARKET LEADER

Since 1958 San Juan Pools has led the world in Fiberglass Pool technology

Fiberglass swimming pools were invented by San Juan Pools over 60 years ago and are available worldwide.

With over 600 independent dealers nationwide, and tens of thousands of pools across America and the world.

San Juan Pools is a family owned business - from our family to your family we deliver excellence.

MASTER CRAFTSMEN

San Juan Pools continues to lead the world in Pool Construction Excellence. Each San Juan Fiberglass Pool is constructed by Master Craftsmen who draw on 60 years of innovation and construction expertise. Your San Juan Pool is hand built with care - to last a lifetime.

MAXIMUM VALUE

Your pool becomes part of your home and a San Juan pool will look just as good in 30 years as the day it was first installed - our legendary quality ensures your home retains its beauty and value when it's time to sell.

For 60 years San Juan Pools has outlasted competitors and imitators, steadfastly producing the finest fiberglass swimming pool available today.

COLD RESISTANT

Even under the extreme cold temperature by using Liquid Nitrogen (-321degrees fahrenheit) a San Juan Fiberglass pool doesn't fail. As you can see in the photos, vinyl liners and concrete crack and break, San Juan does not. This proves that San Juan Pools hold up in extreme cold temperatures.

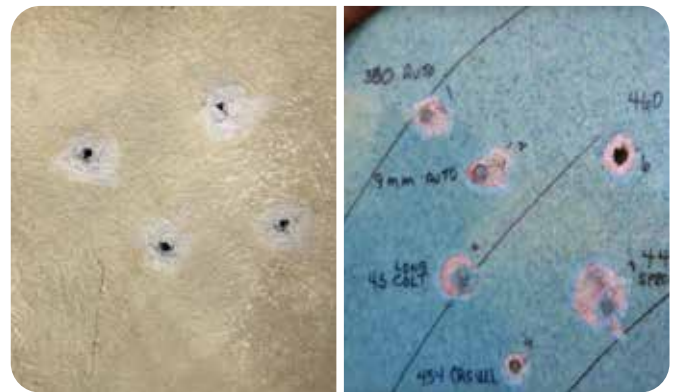

ACID RESISTANT

Muriatic Acid can't harm a San Juan Fiberglass Pool! Acid is a major component in your water chemistry and when not maintained properly it can hurt the finish. This test shows how swimming pool acid can destroy a concrete pool. Pouring Muriatic Acid directly on a concrete pool starts destroying it immediately, however, it has no effect on San Juan pools.

BULLET RESISTANT

Bullet-Proof San Juan Fiberglass Pools! That's right bullet-proof! A 9mm, 380, 45 and 44 magnum did not penetrate the San Juan Pool. This demonstrates the incredible strength of our hand-laid fiberglass pools. Chopped fiberglass pools offer no resistance as seen in the bottom photo.

A SAN JUAN FIBERGLASS POOL HAS SOME SIMILARITIES TO THE COMMON concrete pool, however fiberglass pools bring significant advantages...

Our fiberglass pools are pre-formed and ready to install. We have over 85 designs from small patio pools to some almost 50' long. Whereas a concrete pool takes a very long time to build - often as long as 6 months or longer. A San Juan fiberglass pool can be installed and ready to swim in as little as two week's time. In fact, the only way to tell the difference between a concrete pool and a San Juan Fiberglass pool once they are installed, is that the San Juan fiberglass pool will look just as beautiful as the day it was installed - and that's a big difference.

When people ask us about installing a San Juan fiberglass pool, we will sometimes compare the process to buying a new car - something we have all done with ease. Most new cars today are offered with a base price and then options and additions are added to get the final configuration for the model you want. A new San Juan fiberglass pool is offered in exactly the same manner. There will be a base price - typically \$25,000 to \$45,000 installed - and at that point if you decide not to add anything you will have the full use of your new San Juan fiberglass pool for decades. It will be "swim ready." Many of us, however, will want to consider optional items such as heaters, additional decking, decorative lighting, water features and all the wonderful things that add to your project's final configuration.

As you move closer to finally deciding which San Juan fiberglass pool will meet your needs, there are some considerations that should enter into the decision making process.

WHY DO YOU WANT A POOL?

This would seem to be self explanatory, but your decision to purchase a new San Juan Fiberglass pool might be based on the needs of your family. It might be for your healthy lifestyle, or it might be for entertaining. Each reason will dictate a different style swimming pool, and you should spend time with your sales professional discussing your needs and expectations to be certain your pool is designed to meet all your needs.

WHAT WILL YOU USE THE POOL FOR?

If you want a pool for family sports, that will be a completely different pool from one used to swim laps. San Juan fiberglass pools have a pool design to fulfill every possible requirement.

Take a moment and examine all the possibilities. Often your new pool will need to fulfill multiple roles, from health considerations to family entertainment, and our pool/spa combinations, or sport pools might be exactly what meets your needs. With San Juan fiberglass pools the possibilities are endless.

WHO WILL DO THE MAINTENANCE?

Swimming pool maintenance used to be a big deal, but with new technologies available today, pool maintenance for your new San Juan fiberglass pool is a snap. Fiberglass pools by their nature have significantly reduced maintenance needs. It is possible to build a new San Juan fiberglass pool that is virtually maintenance free. By adding automatic covers, chlorinators and automatic chemical feeders, along with the new robotic pool cleaners, it is possible to leave the pool maintenance to the machines.

Artistic Pools

HEAT RESISTANT

Using a high temperature acetylene torch (5,700 degrees fahrenheit) with its ability to cut through steel still can't hurt a San Juan Pool as you can see in these photos. This proves that San Juan Pools hold up in extreme hot temperatures.

SAN JUAN HIGH-STRENGTH HAND-LAID FIBERGLASS POOLS DON'T REQUIRE LEDGES!

Cheap sprayed on fiberglass pools are built with ledges around them. They are marketed as "safety ledges". These ledges are added to compensate for the weakness of chopped fiberglass pools. Rather than offer safety, they can actually increase the risk of injury. They also make the bottom of the pool significantly narrower and reduce the play area.
